

Forster Woods Adult Day Center is a professionally supervised day program serving the elderly and other adults with physical or mental impairments. We provide a structured day program which includes meaningful social, cognitive, creative, and sensory activities in a warm, caring and secure environment. The program is individualized for each person based on the participant's plan of care.

Independence, self expression and being part of a group helps adults, who may be isolated by illness, disability or loss, maintain a positive orientation to life. By focusing on maintenance of physical and mental health, Forster Woods enables the participant to maintain as high a level of functioning as possible, thereby allowing them to remain in their homes and communities.

We at Forster Woods understand that caring for a loved one with a mental or physical disability requires constant attention and supervision and can be exhausting. Using Forster Woods to supplement the care you give at home offers caregivers an opportunity for rest, employment, errands and to pursue your own interests.
